

Foreign-Key-Paare in water_kg_2

Prüfdokument auf Basis der aktuell in PostgreSQL aktiven Constraints. Ausgelesen am 27.08.2026 11:18. Die Pfeilrichtung lautet immer Quellspalte -> referenzierte Zielspalte.

Referenzierte Tabellen

Lesart

Die Balken zeigen, wie oft eine Tabelle Ziel eines Foreign Keys ist. water_body, monitoring_station und water_raw.source_file sind zentrale Referenzpunkte.

Nullability

Nullable bedeutet: Die Quellzeile darf ohne aufgelöste Zielbeziehung bestehen bleiben. Der Constraint prüft nur vorhandene Werte.

Aktionen

Alle 50 Constraints verwenden für UPDATE und DELETE die Regel NO ACTION.

Hinweis zur Prüfung: Die nummerierte Liste ab Seite 3 ist maßgeblich. Die Matrix auf der nächsten Seite dient der strukturellen Orientierung.

Strukturmatrix

Jede Zahl gibt die Anzahl aktiver Foreign-Key-Paare von der Quelltable in der Zeile zur Zieltabelle in der Spalte an. Leere Felder bedeuten: keine direkte FK-Beziehung.

Quelltable	T01	T02	T03	T04	T05	T06	T07	T08	T09	T10	T11	T12	T13	Summe
catchment							1							1
catchment_groundwater_body	1		1											2
catchment_water_body	1												1	2
chemical_status			1					1		1			1	4
core_location													1	1
groundwater_body							1							1
measurement				1		1				1	1	1	1	6
monitoring_station													1	1
paleo_measurement		1			1					1				3
protected_area										1				1
protected_area_assessment			1						1	1			1	4
sampling_section				1						1			1	3
station_alias				1						1			1	3
station_assessment				1		1				1		1	1	5
station_catchment	1			1										2
station_groundwater_body			1	1										2
water_body							1							1
water_body_assessment						1				1			1	3
water_body_groundwater_body			1										1	2
water_body_identifier													1	1
water_body_protected_area									1				1	2

Zieltabellen

T01 catchment
T04 monitoring_station
T07 planning_unit
T10 raw.source_file
T13 water_body

T02 core_location
T05 paleo_element
T08 pollutant
T11 sampling_section

T03 groundwater_body
T06 parameter
T09 protected_area
T12 unit

Vollständige FK-Prüfliste

Die Reihenfolge ist nach Quelltable und Constraint-Name sortiert. Die Spalte OK kann bei einer manuellen fachlichen Prüfung abgehakt werden.

OK	ID	Quellspalte	Zielspalte	NULL	Constraint	Regeln
☐	FK01	catchment.planning_unit_code	planning_unit.planning_unit_code	ja	fk_catchment_planning_unit	U: NO ACTION D: NO ACTION
